

COMMUNITY Solutions Network

A Program of Future Cities Canada

Victoria Idea Camp

DATE: Wednesday, October 30, 2019 | 9:00am-2:30pm

In partnership with:

As part of the 2019 Livable Cities Forum:
Building Better Communities Through Resilience

Objective

The Victoria Idea Camp will provide an opportunity for municipalities to connect, share, and ask questions around smart cities, which achieve meaningful outcomes for residents through the use of data and connected technology. The conversation will start by exploring the connection between smart cities approaches and how digitization and information technology can provide opportunities to achieve broader resilience goals.

Agenda

- 9:00-9:15 Welcome and Introductions
- 9:15-10:15 Activity One: An interactive session to engage participants in conversations around their experiences with open smart city approaches
- 10:15-10:45 Presentation on Smart City Strategies and Opportunities to Connect with Resilience Initiatives
- 10:45-11:00 Networking Break
- 11:00-12:00 Reality Check Session: The “Reality Check” is a niche, in-depth session that focuses on the reality of open smart cities for a particular city. This element will provide a localized case study – led by staff from the municipality – with lessons learned that has relevance for other jurisdictions looking to better understand or apply smart cities approaches.
- 12:00-12:30 Lunch
- 12:30-1:15 Panel Discussion: Three municipal representatives will share their experiences of considering smart cities approaches to advance resilience.
- 1:15-2:15 Activity Two: Small group discussions hosted by each of the three panelists that will centre around the themes each municipality presented.
- 2:15-2:30 Workshop Take-aways and Workshop Closing
